Hamza Rizwan

Software Quality Assurance Engineer at Red Buffer
Rawalpindi District

Summary

Enhancing real-life interactions through software.

Bs Computer Science with excellent experience in software quality assurance with high-performance applications and services. My skill set includes, but is not limited to,

- Develop a test plan and test strategy.
- Managing QA processes throughout the lifecycle of a project.
- Plan, develop and execute Test cases for each release.
- Client communication regarding requirements, milestones, and releases.
- Coordination and communication with the off-shore team regarding product features and bugs.
- Review specification requirements, design documents, and change requests.
- Analyze and evaluate business logic for products and identify gaps between product development stories and business needs.
- Reporting after each test cycle, build and feature release.
